Sanskrit Pro driver setup

Issues 1 cacliu 2015/6/1

Install instructions:

This model is automatically driver-setup. It will download and install driver itself after plugin USB.

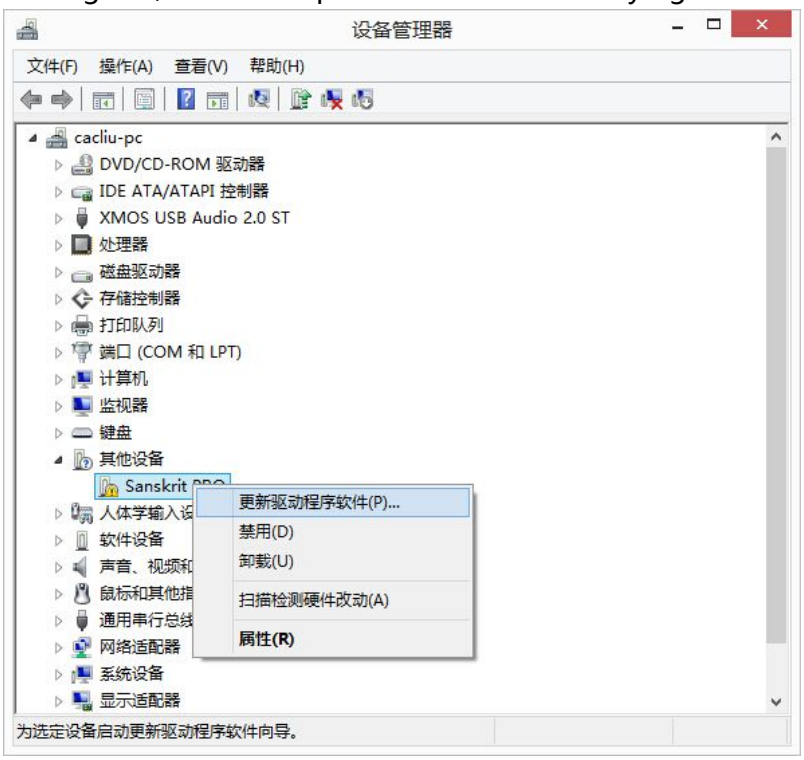
Following steps are only for reference when you are fail to automatically install driver

- This file only for Windows 7/8/8.1/10 user
- Mac OS X user needn’t install device driver

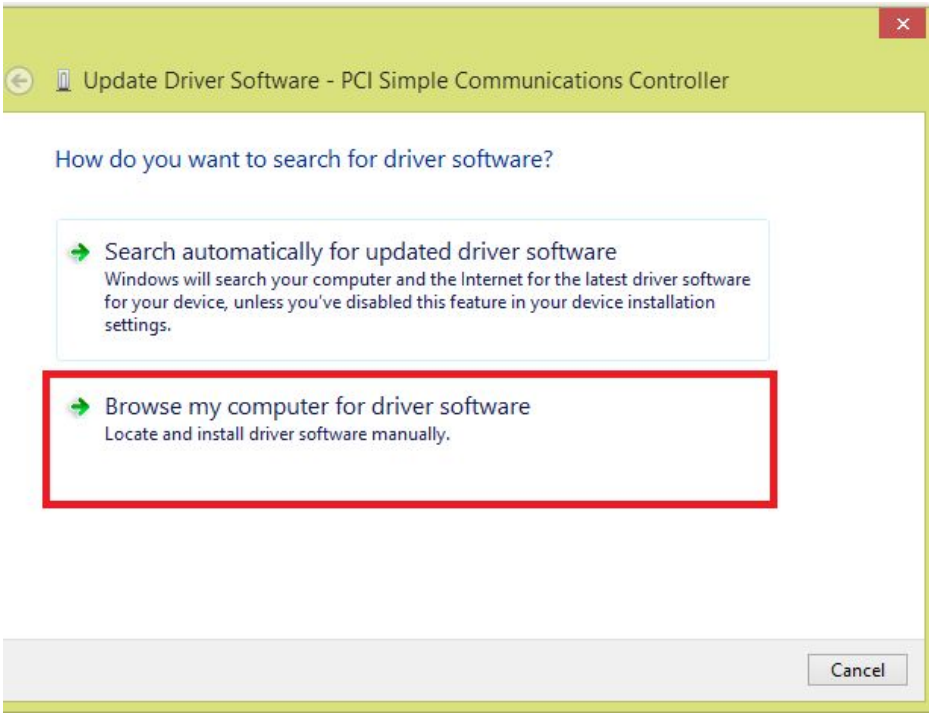
Installation steps:

1. Open”control panel”and click ”Hardware and sound ”

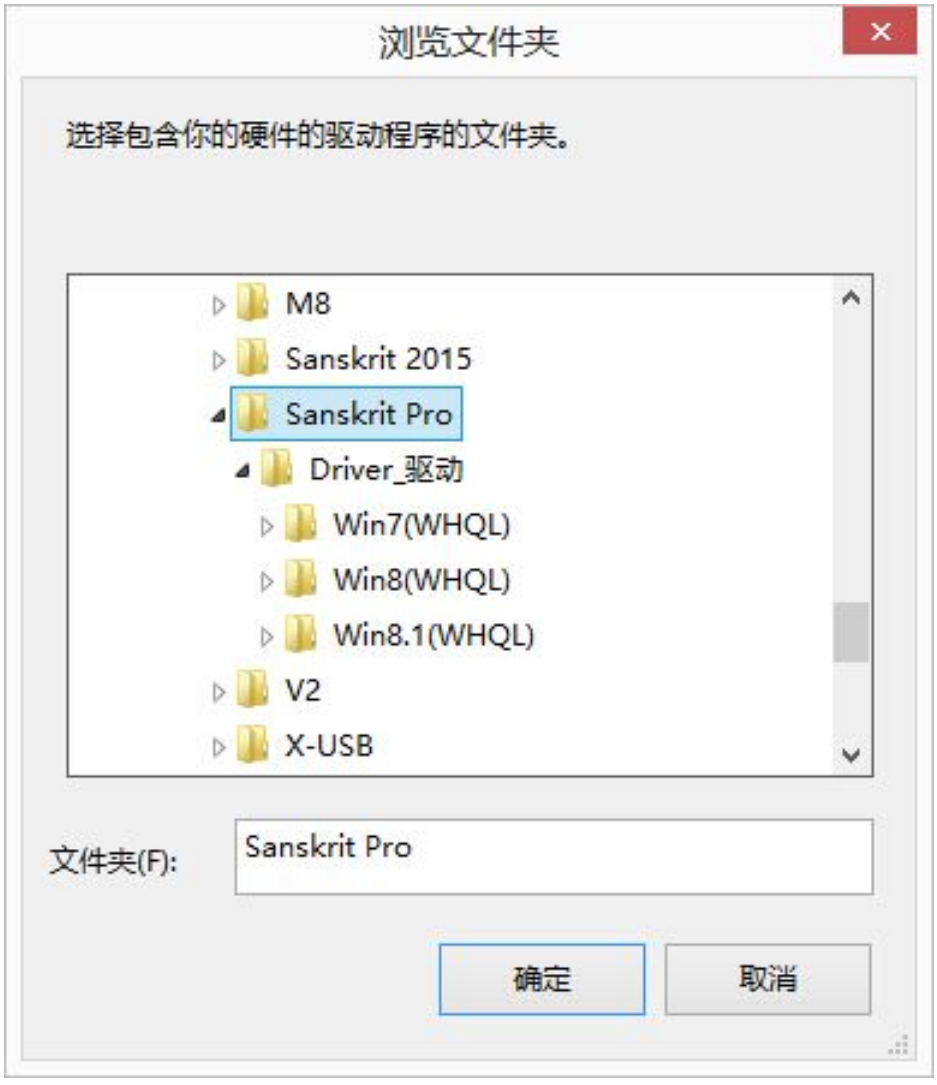
2. Open”Device manager”, and then update driver software by right-click



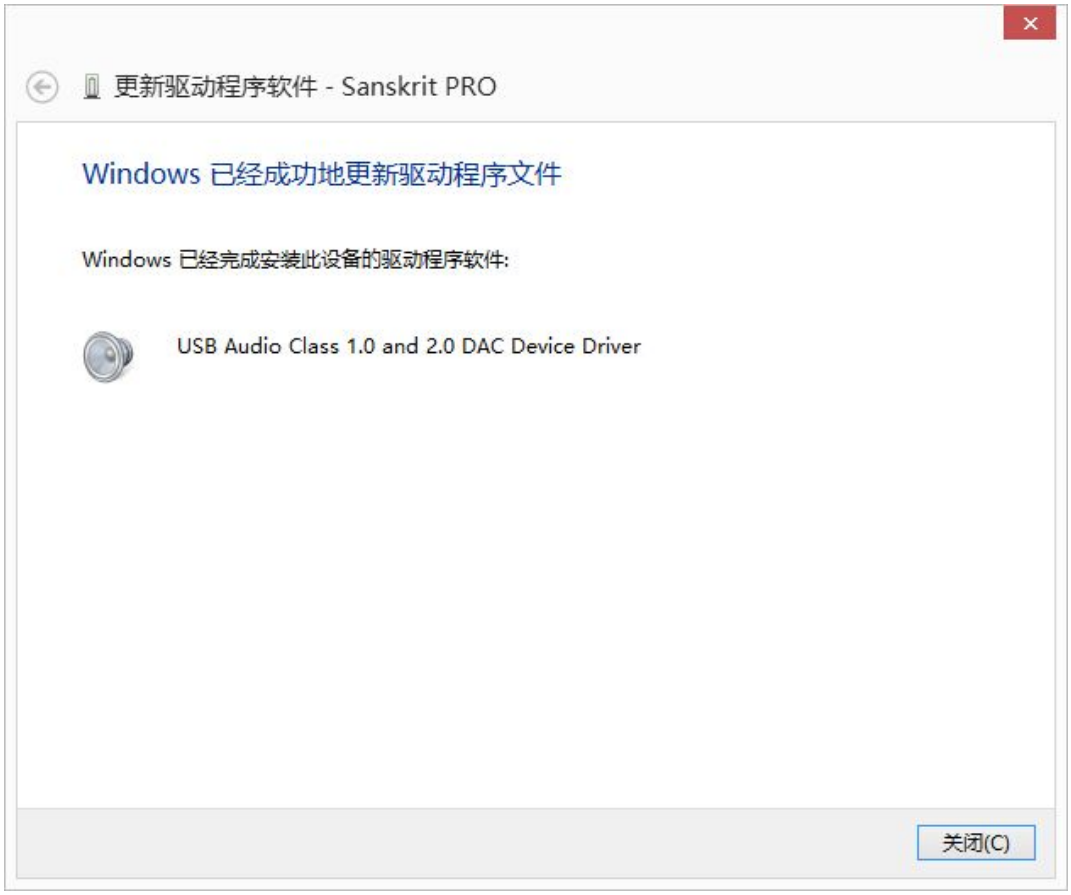
3. Select “Browse my computer for driver software”



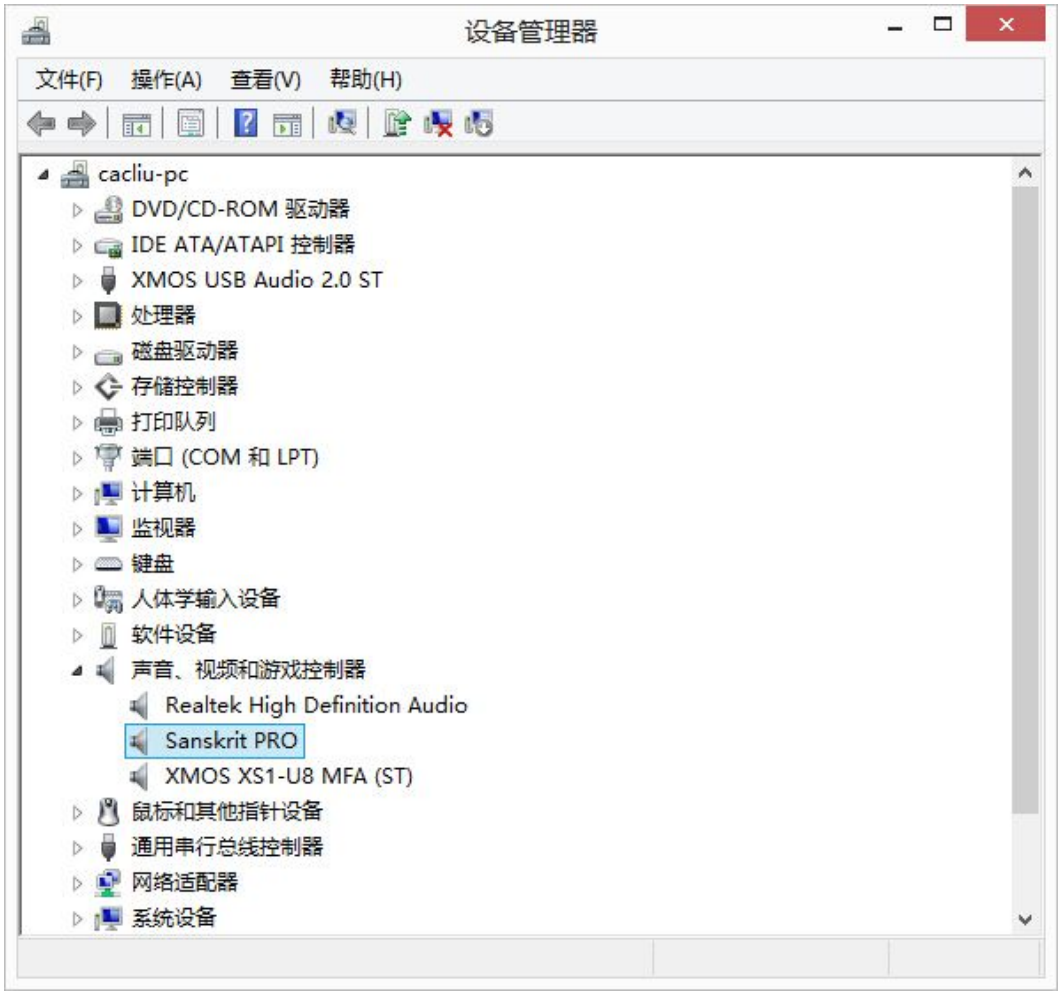
4. Find Sanskrit pro from driver disk when open “browse folder”.and also select driver files from your system.



5. Driver installation finished.

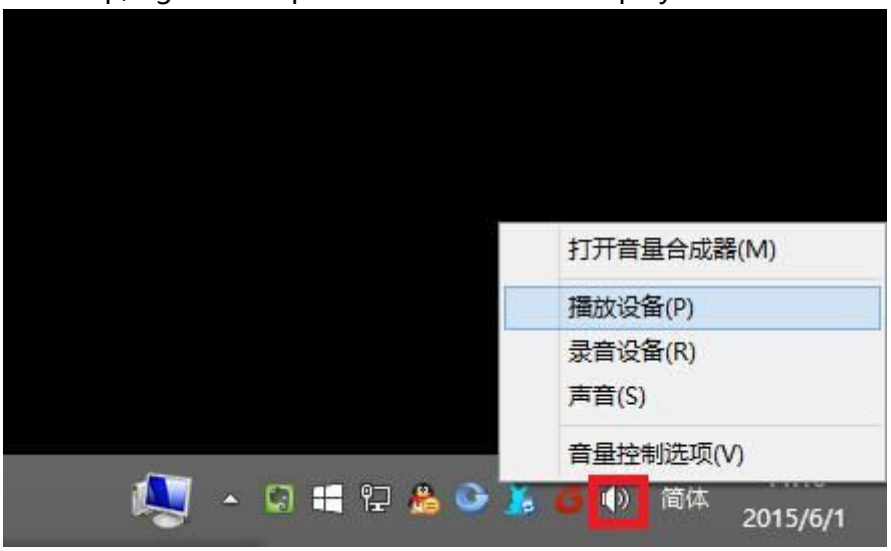


6. After finishing installation, you will see" Sanskrit pro" under "Sound device"



Using with Sanskrit Pro:

1. Back to desktop, right-click speaker icon and select” playback devices”



2. Open” Sound.” ,and set” Sanskrit Pro” to be as default communication device , so that Sanskrit pro is default audio device for windows, all the sound will come out from Sanskrit Pro.
