

KEEP MUSIC ALIVE

VOXTOK and QOBUZ Enter Worldwide Partnership for High Quality Music Streaming and Download Service

Voxtok and Qobuz, the first high-fidelity music service, partner to provide streaming, purchasing and downloading of music to Voxtok's new easy-to-use audiophile products.

This system is made of three main elements:

- A Voxtok Hi-Fi device which includes an audiophile player, a home music server and local storage.
- A set of cloud services based on both Qobuz (streaming, purchasing and music storage) and Voxtok's (local and on-the-go streaming) infrastructures.
- Voxtok's app for mobiles, tablets, computers and connected TVs.

This Hi-Fi device supports all the available formats in Qobuz's catalog, from the most limited to the most advanced, as well as future formats such as DSD.

Qobuz's entire music catalog is perfectly integrated and enables a simple and unified access to content that is already owned by users or offered on-demand by Qobuz.

Voxtok just launched its flagship product on **Kickstarter** and also includes an open DIY version based on the Raspberry Pi board. You can discover and support that campaign on Kickstarter: <http://www.kickstarter.com/projects/1385897175/hi-res-audio-experience-for-all-by-voxtok>

Certain Kickstarter participation levels will include a special streaming and download offer from Qobuz.

The Voxtok Hi-Fi system, now with Qobuz, will be the most complete high-quality music product on the market.

About QOBUZ

Qobuz is the first online music service that gives access to all the labels (majors and independents) and all artists in all genres of music in High Fidelity.

Qobuz offers:

- Subscriptions to unlimited music streaming in True CD quality** (16 bit / 44.1 kHz)
- Lossless downloads in True CD quality (16 bit / 44.1 kHz) of its entire catalog (more than 18 million titles)
- Download HD in 24-bit/192 kHz of over 12,000 albums « Qobuz Studio Masters ».

Qobuz also offers extensive documentation on albums including tens of thousands of digital books, biographies and interviews with artists, and many exclusive editorial contents.

These services are available through several applications such as Desktop for Windows and Mac OS and Mobile for iOS, Android and Windows 8.

Thanks to the API, the Qobuz service is now integrated and available on all the products of the biggest audio manufacturers.

* Available in some countries.

** Available in France, United Kingdom, Ireland, Belgium, The Netherlands, Luxembourg, Germany, Austria and Switzerland.
