

Press Release – 31th May 2016

Qobuz becomes the first lossless music streaming service integrated with Yamaha

Another prestigious brand has shown great confidence in Qobuz from today: Yamaha has announced the integration of Qobuz with some of its MusicCAST products. This multiroom¹ technology, a revolution in the music world, allows for a precise control of the listener's desired sound space. Fans of 24-Bit Hi-Res will have every opportunity to stream their music on Qobuz in superior sound quality via the intuitive and ergonomic Yamaha MusicCAST application, which is compatible with both iOS and Android. The application supports a complex search engine, facilitates album and artist discovery, allows access to playlists, management of favourites, and more. In all, there are 11 Home cinema amplifiers and 2 MusicCast Gateway that are compatible with Qobuz and make the musical experience even more exhilarating thanks to the WXA-50 and WXC-50 gateways.

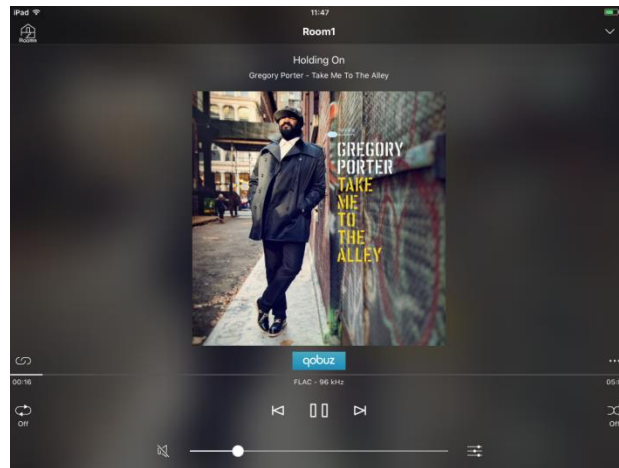

The Home Cinema amplifier RXA-860

MusicCast Gateway & WXA-50 Amplifier²

¹ Wireless music diffusion throughout numerous rooms in the home.

² Wireless network player (connected to the internet) allowing music streaming

Interface of Yamaha application

The coming together of two leaders in the world of Hi-Res and Hi-Fi music streaming represents an establishment of similar beliefs and values in terms of being as faithful as possible to the original recording.

The collaboration won't stop there. Qobuz aims for integration with more and more MusicCAST products, so that the user can enjoy the widest possible choice.
